

The 350 ICLEAN model is the single-phase 3-motor vacuum cleaner par excellence. Model most appreciated by those who use it in daily work, especially in the field of surface treatment. It proves to be the most efficient single-phase vacuum cleaner in the world for the suction of fine dust, deriving from machines in production such as sanders. Its field of application is not limited to construction, but ranges in many sectors in which fine dust represents a difficult problem for conventional industrial vacuum cleaners.
